Scope and Objectives

In September 2021, mBank S.A. Group (“mBank”, the “Issuer” or the “Group”) issued a EUR 500 million Certified Climate Bond (green bond) aimed at refinancing low carbon buildings to improve the sustainability performance of its real estate portfolio in Poland. In February 2022, mBank engaged Sustainalytics to review the assets refinanced through the issued green bond, and to provide an assessment as to whether the assets refinanced in September 2021 met the Post-Issuance Requirements under the Low Carbon Buildings¹ criteria of the Climate Bonds Standard Version 3.0².

Green bond assets include single-family and multi-family houses in Poland.

Schedule 1 provides details of the Nominated Assets and disbursement of proceeds.

Post-Issuance Evaluation Criteria

Post-issuance Requirements of the Climate Bonds Standard Version 3.0:

- Use of Proceeds
- Evaluation and Selection of Projects & Assets
- Management of Proceeds
- Reporting

Issuing Entity’s Responsibility

mBank is responsible for providing accurate information and documentation relating to the details of the projects that have been funded, including description of projects, total development cost of each project, and disbursed amounts.

Independence and Quality Control

Sustainalytics, a leading provider of ESG and corporate governance research and ratings to investors, conducted the verification of mBank’s green bond, issued to refinance low carbon building projects, and provided an independent opinion informing mBank as to the conformance of the green bond with the Post-Issuance Requirements and Low Carbon Buildings criteria of the Climate Bonds Standard.

Sustainalytics has relied on the information and the facts presented by mBank with respect to the Nominated Projects & Assets. Sustainalytics is not responsible nor shall it be held liable if any of the opinions, findings, or conclusions it has set forth herein are not correct due to incorrect or incomplete data provided by mBank.

Sustainalytics makes all efforts to ensure the highest quality and rigor during its assessment process and enlisted its Sustainability Bonds Review Committee to provide oversight over the assessment of the bond.

Verifier's Responsibility

Sustainalytics conducted the verification in accordance with the Climate Bonds Standard Version 3.0 and with International Standard on Assurance Engagements 3000 (ISAE 3000) – Assurance Engagements other than Audits or Reviews of Historical Financial Information.

The work undertaken as part of this engagement included conversations with relevant mBank employees and review of relevant documentation to confirm the conformance of mBank's green bond with the Post-Issuance Requirements of the Climate Bonds Standard Version 3.0.

Exceptions

No exceptions were identified. All projects aligned with the Post-Issuance Requirements of the Climate Bonds Standard Version 3.0 and were in conformance with the Low Carbon Buildings criteria.

Conclusion

Based on the limited assurance procedures conducted and evidence obtained, nothing has come to Sustainalytics' attention that causes us to believe that, in all material respects, the allocation of EUR 498.7 million net proceeds from the mBank Certified Climate Bond, issued to fund eligible green projects, is not in conformance with the Post-Issuance Requirements of the Climate Bonds Standard.

⁴ EUR/PLN exchange rate of January 26, 2022 is used for calculating the signed amounts.

⁵ Sustainalytics notes that the amount that has been earmarked for allocation (EUR 535.15 million) is higher than the amount raised (EUR 500 million) through the green bond issuance as the amount earmarked is representative of the signed amount of the loan contracts that have been refinanced. However, mBank has informed Sustainalytics that there have already been pay-offs realized on the portfolio since disbursement.
