## Introduction

In September 2021, Mitsubishi Heavy Industries, Ltd. (“MHI”) issued a green bond aimed at financing projects related to renewable energy/clean energy (JPY 15 Billion 5-Year Green Bond, hereinafter the “2021 Green Bond”). As of March 31, 2022, the proceeds were allocated to two projects related to renewable energy/clean energy. In March 2023, MHI engaged Sustainalytics to review the project funded through the 2021 Green Bond and assess whether the projects met the Use of Proceeds criteria and the Reporting commitments outlined in the Mitsubishi Heavy Industries, Ltd.’s Green Bond Framework (the “Framework”).<sup>1</sup>

## Evaluation Criteria

Sustainalytics evaluated the project funded with proceeds from September 2021 to March 2022 based on whether the project:

1. Met the Use of Proceeds and Eligibility Criteria outlined in the Framework; and
2. Reported on the impact indicators for each Use of Proceeds criteria outlined in the Framework.

Table 1 lists the Eligibility Criteria and associated impact indicators for the Use of Proceeds category to which the proceeds were allocated.
